

# MOE-Cart

Expand your cleaning capacity beyond pump sprayers and tiny two-gallon tanks

## Boost your productivity!

The Moe-Cart is the single most dramatic way to increase the productivity of all counter rotating cylindrical brush carpet cleaners. With a 16-gallon solution tank, 100 foot hose and 150 psi pump, you

can pre-spray thousands of yards of carpet without stopping to search and/or travel back and forth to distant water sources. The platform in front has a tray that is custom made for LittleMoe, but the tray is also

removable to enable the Moe-Cart to accept and carry many different machines. Getting your water, equipment and chemistry to and from the job has never been easier.
